

Our ref: *Naylor-CE Marking*

11th January 2016

To whom it may concern:

I refer to *CE Marking Requirements for Naylor Metroduct*.

The Construction Products Regulations (CPR) require manufacturers to provide a Declaration of Performance (DoP) and affix a CE mark to products that are made in compliance with a Harmonised European Standard (hEN), or where a European Technical Assessment (ETA) has been issued to cover that product.

Naylor Metroduct complies with the requirements of BS EN 61386-24. However, this standard is not yet harmonised, and no ETA has been issued to cover this product.

As a result we cannot affix a CE mark, and do not supply a DoP for the product.

Yours sincerely

A handwritten signature in black ink, appearing to read "A. Cliff". The signature is stylized and somewhat cursive.
